

Presentations, Trainings, & Seminars 2009-2015

Using art in presentations, trainings, and workshops is an extremely effective, memorable, and transformational process. It is easy to convey your goals and objectives in such a way that seem non threatening and even playful. Participants feel at ease to communicate their needs, dreams, and goals, through solution creative activities.

Angelina H. Rodriguez, LPC-S, ATR-BC has been asked to present at events in local, state, and national conferences, schools, universities, hospitals, staff retreats, as well as specialty groups. She is a provider of Continuing Education Units.
